ORGANISING CHAIRMAN’S MESSAGE:

On behalf of the Asian School of Urology and the Malaysian Urological Association, it is with greatest pleasure that we invite you to the 1st Asian School of Urology Workshop on Understanding and Managing Prostate Diseases. This will be held at the Institute of Urology, Hospital Kuala Lumpur scheduled on the 28th-31st July 2005. The invited speakers for this workshop are renowned authorities on prostate diseases in this region and will address the relevant topics of importance in prostate diseases.

The Asian School of Urology was formed in 1997 and it is an important component of the Urological Association of Asia with the objective of promoting continuous medical education and current innovations in the field of urology in Asia. This workshop by the Asian School of Urology has been designed to consist of operative sessions for the first 2 days. Participants will observe operative procedures which include Robotic Prostatectomy, miscellaneous non-prostate robotic surgical procedures, new advances in transrectal ultrasonography of the prostate (including color and power Doppler, harmonic imaging and 3-D ultrasonography) and Gyrus (Plasmakinetic) TURP. An additional ultrasonography workshop on new investigational techniques in assessment of Female Stress Urinary Incontinence has also been planned during this period. There will be ongoing lectures and discussions during this operative workshop.

This will be followed by another 2 days of lectures on BPH, prostatitis and prostate cancer intended to emphasize on the more recent understanding and management of the disease. The topics may appear exhaustive but are nevertheless relevant.

We look forward to welcoming you to Kuala Lumpur to participate in this workshop.
